June 2021 - Jan 2023

Iqra Technology, Aurangabad – Business Intelligence Developer

- Led the development of over 4 dashboards and reports using Qlik Sense, improving data accessibility for 40+ users. Skilled in creating Data Modelling, scripting, visualization, and reporting techniques from various sources.
- Resolved production issues such as report failures and data discrepancies, achieving a 95% success rate in report generation.
- Developed and automated customized reports using Qlik Nprinting, reducing manual reporting time by 40%.
- Managed Qlik Sense installations, server migrations, and maintenance.
- Proficient in Qlik server setup, security implementation, and admin activities.
- Designed daily refresh processes and managed tasks using QMC.

Projects

Client: [Ghobash Group \[Link\]](#)

Service Contract Dashboard - [Qlik Sense | Oracle]

- Designed and implemented an end-to-end Service Contract Dashboard using Qlik Sense, automating contract monitoring and tracking, which improved efficiency by 50% and provided real-time updates on 100+ active contracts.
- Enabled GCGES management to monitor active contract values and trends, leading to better decision-making and a projected 15% increase in contract renewals.

Inventory Dashboard - [Qlik Sense | Oracle]

- Developed a Qlik Sense dashboard for inventory management, integrating data to provide insights on stock levels, inventory value, and transactions, enhancing inventory accuracy by 20%.
- Enabled precise monitoring of stock levels and inventory values by brand, item, and region, facilitating informed decision-making for managers and executives.
- Enhanced the efficiency of inventory tracking, resulting in a more streamlined inventory management process and a 15% reduction in inventory holding costs.

Migration of Dashboard - [QlikView | Qlik Sene | Oracle]

- Successfully migrated 2 dashboards from QlikView to Qlik Sense, enhancing performance and insights for 8 users.
- Executed data cleaning and transformation, scheduled daily extractor runs, built a data model, developed an insightful dashboard on Qlik Sense Enterprise, and reconciled the data.

June 2023 - Present

Career Break - Professional Development & Learning

- **Qlik Community Expertise:** [Qlik Community profile \[Link\]](#)
Authored over 29+ solutions, earning recognition as a valuable **Creator III** and demonstrating rapid problem-solving capabilities. This achievement places me among the **top 1,034 members** known for their substantial knowledge and leadership in the Qlik user community.
